

1. gated channel activity
2. ionotropic glutamate receptor activity
3. channel regulator activity
4. G protein-coupled receptor binding
5. peptide binding
6. G protein-coupled peptide receptor activity
7. neurotransmitter transmembrane transporter activity

8. ammonium ion binding
9. guanylate cyclase activity
10. calcium-dependent phospholipid binding
11. hormone binding
12. amino acid binding
13. monoamine transmembrane transporter activity
14. catecholamine binding
