

- |   |  |
|---|--|
| 1. gated channel activity                 | 8. hormone binding                       |
| 2. neuropeptide receptor activity         | 9. heparin binding                       |
| 3. cytoskeletal motor activity            | 10. collagen binding                     |
| 4. microtubule binding                    | 11. NAD+ ADP-ribosyltransferase activity |
| 5. peptide binding                        | 12. NAD+ binding                         |
| 6. calcium-dependent phospholipid binding | 13. oxygen binding                       |
| 7. neurotransmitter binding               |  |
