

- |                                |  |
|--------------------------------|--|
| 1. transport vesicle           | 11. voltage-gated potassium channel complex      |
| 2. presynaptic active zone     | 12. growth cone                                  |
| 3. synaptic membrane           | 13. terminal bouton                              |
| 4. distal axon                 | 14. stereocilium bundle                          |
| 5. actin-based cell projection | 15. guanylate cyclase complex, soluble           |
| 6. perikaryon                  | 16. basal cortex                                 |
| 7. synaptic vesicle membrane   | 17. basal part of cell                           |
| 8. photoreceptor inner segment | 18. protein serine/threonine phosphatase complex |
| 9. dendritic spine             | 19. actin cytoskeleton                           |
| 10. glutamatergic synapse      | 20. postsynaptic specialization                  |
