

- |  |   |
|--|---|
| 1. amine transport                       | 11. response to electrical stimulus                                 |
| 2. regulation of membrane potential      | 12. response to cocaine   |
| 3. neurotransmitter transport            | 13. synaptic transmission, glutamatergic                            |
| 4. regulation of catecholamine secretion | 14. cGMP metabolic process  |
| 5. sensory perception of pain            | 15. detection of stimulus involved in sensory perception            |
| 6. glutamate receptor signaling pathway  | 16. cyclic-nucleotide-mediated signaling                            |
| 7. catecholamine secretion               | 17. synaptic vesicle localization                                   |
| 8. negative regulation of behavior       | 18. sodium ion homeostasis  |
| 9. synaptic vesicle cycle                | 19. adenylate cyclase-modulating G protein-coupled receptor sign... |
| 10. sodium ion transmembrane transport   | 20. catecholamine metabolic process                                 |
