

- |   |   |
|---|---|
| 1. monoatomic cation channel activity                             | 8. neurotransmitter binding   |
| 2. tubulin binding  | 9. peptide binding  |
| 3. cytoskeletal motor activity                                    | 10. collagen binding  |
| 4. potassium ion transmembrane transporter activity               | 11. exopeptidase activity   |
| 5. ligand-gated monoatomic cation channel activity                | 12. NAD+ ADP-ribosyltransferase activity                            |
| 6. calcium-dependent phospholipid binding                         | 13. DNA-binding transcription repressor activity, RNA polymerase... |
| 7. neurotransmitter receptor activity involved in regulation of.. | 14. heparin binding   |
