

- | | |
|---|------------------------------------|
| 1. ribosomal subunit | 11. nuclear pore |
| 2. chromosomal region | 12. Sm-like protein family complex |
| 3. mitochondrial protein-containing complex | 13. proteasome complex |
| 4. cytosolic ribosome | 14. protein-DNA complex |
| 5. condensed chromosome | 15. nuclear speck |
| 6. precatalytic spliceosome | 16. spindle |
| 7. replication fork | 17. proteasome accessory complex |
| 8. kinetochore | 18. proteasome regulatory particle |
| 9. mitochondrial inner membrane | 19. proteasome storage granule |
| 10. mitochondrial ribosome | 20. nuclear periphery |
