

1. rRNA processing
2. protein-RNA complex assembly
3. protein folding
4. positive regulation of telomerase RNA localization to Cajal ...
5. telomerase RNA localization to Cajal body
6. cytoplasmic translational initiation
7. positive regulation of protein localization to Cajal body
8. protein localization to Cajal body
9. response to unfolded protein
10. intracellular protein transmembrane transport

11. detection of visible light
12. cleavage involved in rRNA processing
13. endoplasmic reticulum unfolded protein response
14. telomere maintenance via telomerase
15. positive regulation of telomere maintenance via telomerase
16. ribonucleoprotein complex localization
17. binding of sperm to zona pellucida
18. toxin transport
19. regulation of translational initiation
20. cholesterol biosynthetic process
