

- | | |
|---|------------------------------------|
| 1. chromosomal region | 11. protein-DNA complex |
| 2. condensed chromosome | 12. Sm-like protein family complex |
| 3. preribosome | 13. proteasome accessory complex |
| 4. mitochondrial protein-containing complex | 14. nuclear speck |
| 5. kinetochore | 15. proteasome regulatory particle |
| 6. replication fork | 16. proteasome storage granule |
| 7. proteasome complex | 17. spindle |
| 8. precatalytic spliceosome | 18. mitochondrial inner membrane |
| 9. mitochondrial matrix | 19. cytosolic ribosome |
| 10. nuclear pore | 20. nuclear periphery |
