

- |  |   |
|--|---|
| 1. mitotic sister chromatid segregation              | 11. mitotic cytokinesis                                 |
| 2. mitotic nuclear division                          | 12. DNA conformation change                             |
| 3. meiotic cell cycle process                        | 13. digestive system development                        |
| 4. regulation of chromosome segregation              | 14. positive regulation of cell cycle                   |
| 5. regulation of nuclear division                    | 15. digestive tract development                         |
| 6. DNA replication                                   | 16. actomyosin structure organization                   |
| 7. negative regulation of cell cycle process         | 17. regulation of cell division                         |
| 8. regulation of mitotic cell cycle phase transition | 18. regulation of meiotic cell cycle                    |
| 9. metaphase plate congression                       | 19. negative regulation of sister chromatid segregation |
| 10. spindle organization                             | 20. protein localization to kinetochore                 |
