

- 1. cilium organization
- 3. ear development
- 4. inner ear development
- 5. central nervous system neuron differentiation

2. homophilic cell adhesion via plasma membrane adhesion molecu...

- 6. neuron fate commitment
- 7. ear morphogenesis
- 8. cilium-dependent cell motility
- 9. axonemal dynein complex assembly
- 10. sensory perception of sound

- 11. extracellular transport
- 12. regulation of axon guidance
- 13. action potential
- 14. negative regulation of neurogenesis
- 15. axon extension
- 16. formation of primary germ layer
- 17. potassium ion transmembrane transport
- 18. response to auditory stimulus 19. axon midline choice point recognition
- 20. mating
