

- 1. nuclear chromosome segregation
- 2. double-strand break repair
- 3. regulation of mitotic sister chromatid segregation
- 4. olefinic compound metabolic process
- 5. septate junction assembly
- 6. metaphase plate congression
- 7. spinal cord development
- 8. toxin catabolic process
- 9. homophilic cell adhesion via plasma membrane adhesion molecu...10. regulation of tube size, open tracheal system

- 11. phytosteroid metabolic process12. xenobiotic metabolic process
- 13. response to camptothecin
- 14. lauric acid metabolic process
- 14. lauric acid metabolic proc
- 15. stem cell proliferation
- 16. unsaturated fatty acid metabolic process
- 17. regulation of stem cell proliferation
- 18. retinal ganglion cell axon guidance
- 19. protein localization to kinetochore
- 20. DNA ligation involved in DNA repair
