

- 1. cilium organization
- 2. cilium movement
- 3. regulation of membrane potential
- 4. homophilic cell adhesion via plasma membrane adhesion molecu...
- 5. neuropeptide signaling pathway
- 6. ear development
- 7. adult behavior
- 8. forebrain development
- 9. cilium-dependent cell motility
- 10. sensory perception of mechanical stimulus

- 11. potassium ion transport
- 12. positive regulation of monoatomic ion transport
- 13. central nervous system neuron differentiation
- 14. axonemal dynein complex assembly
- 15. negative regulation of synaptic transmission
- 16. ear morphogenesis
- 17. response to amine
- 18. regulation of behavior
 - 19. detection of abiotic stimulus
 - 20. regulation of cytosolic calcium ion concentration
